

1. Open your Wi-Fi settings and connect to the TVCC\_Setup network

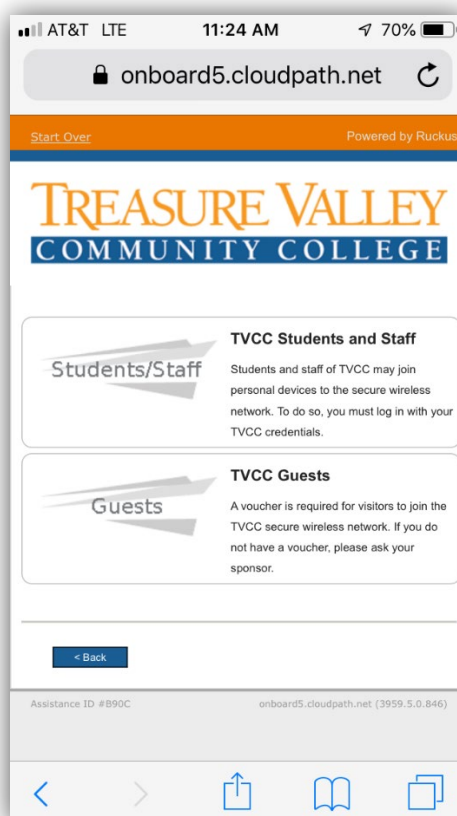

2. Open Safari and go to [wifi.tvcc.cc](http://wifi.tvcc.cc) (You must use Safari)

3. Check the box if you agree to the 'Terms & Conditions' and touch 'Start'

4. Select 'TVCC Students and Staff'

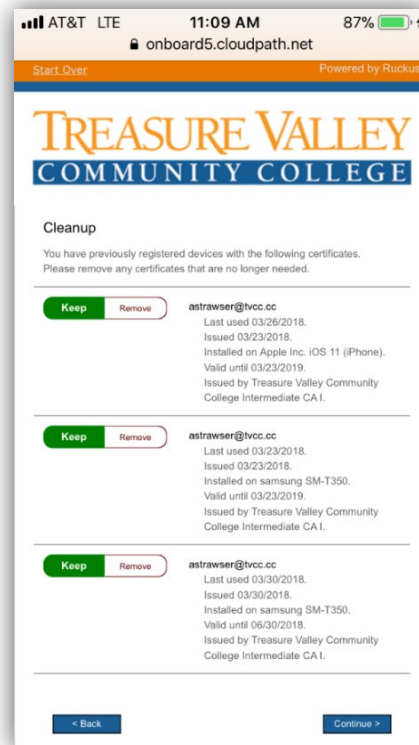

5. Enter your TVCC username and password and choose 'Continue'

A screenshot of a mobile web browser displaying the onboarding page for Treasure Valley Community College. The status bar at the top shows 'AT&T', signal strength, time '9:21 AM', and battery '90%'. The address bar shows 'onboard5.cloudpath.net'. The page has an orange header with 'Start Over' and 'Powered by Ruckus'. The main heading is 'TREASURE VALLEY COMMUNITY COLLEGE'. Below this, a message states: 'Your username and password are required to access the network.' There are two input fields: 'Username:' with the text 'astrawser1' and 'Password:' with masked characters '.....'. At the bottom of the form are two buttons: '< Back' and 'Continue >'. A footer area contains 'Assistance ID #9CB3' and 'onboard5.cloudpath.net (3761.5.0.804)'. The mobile navigation bar at the very bottom has icons for back, forward, share, bookmarks, and tabs.

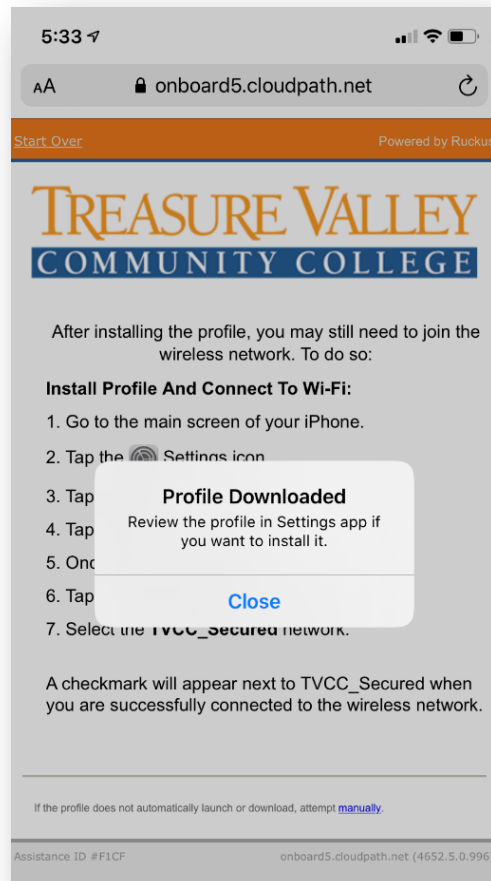

6. Select Secure Registration

A screenshot of a mobile web browser displaying the registration options page for Treasure Valley Community College. The status bar at the top shows the time '5:31', signal strength, and battery. The address bar shows 'onboard5.cloudpath.net'. The page has an orange header with 'Start Over' and 'Powered by Ruckus'. The main heading is 'TREASURE VALLEY COMMUNITY COLLEGE'. Below the heading, there are two registration options, each with a large arrow icon pointing right. The first option is 'TVCC\_Secured' with the sub-header 'Secure Registration'. Its description reads: 'This option allows you to join your personal device to the "TVCC\_Secured" wireless network. All network traffic will be encrypted. Devices must be able to download and install a certificate. This will include most smartphones, tablets, and computers.' The second option is 'TVCC\_Unsecured' with the sub-header 'Mac Registration'. Its description reads: 'This option allows you to join your personal device to the "TVCC\_Unsecured" wireless network. Devices do not need to install anything to join. Network traffic is not encrypted. This would include gaming devices, smart TVs, etc.' At the bottom of the form is a '< Back' button. A footer area contains 'Assistance ID #F1CF' and 'onboard5.cloudpath.net (4652.5.0.996)'. The mobile navigation bar at the very bottom has icons for back, forward, share, bookmarks, and tabs.

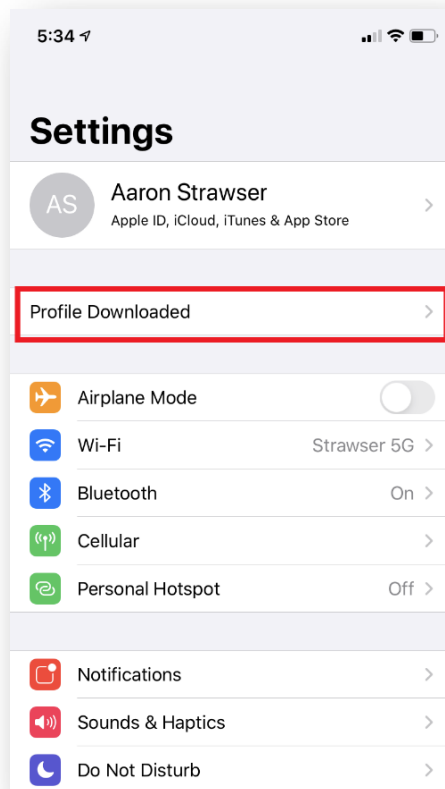

7. You may be prompted with a 'Cleanup' page. Cloudpath allows 4 devices per user. If you see 4 devices, choose to remove one or more to continue. Removed devices will no longer connect to the TVCC network.

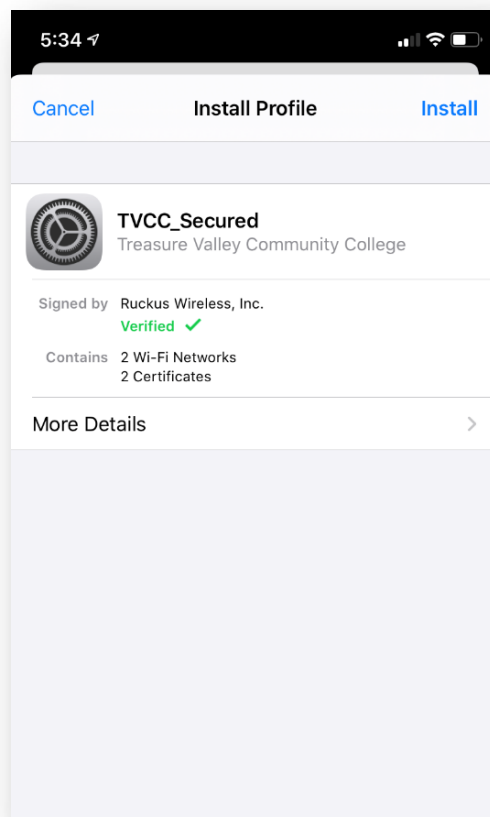

8. Once you see the Profile Downloaded, press 'Close' and follow the instructions on the screen by going to Settings on your device

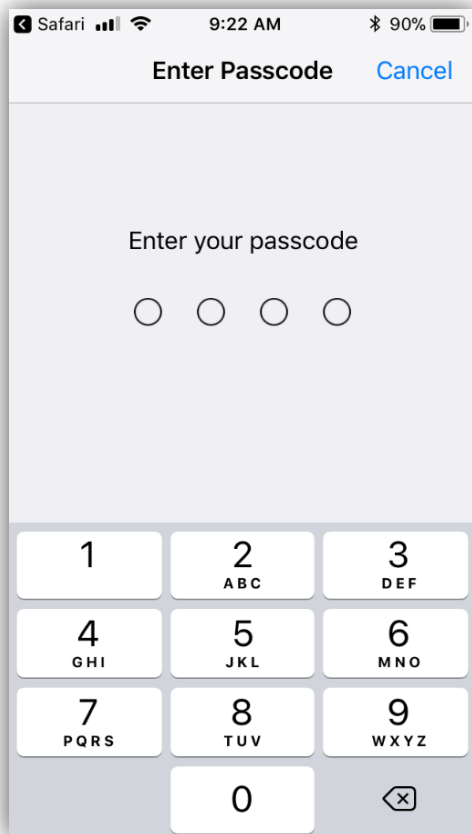

9. Touch where it says 'Profile Downloaded'

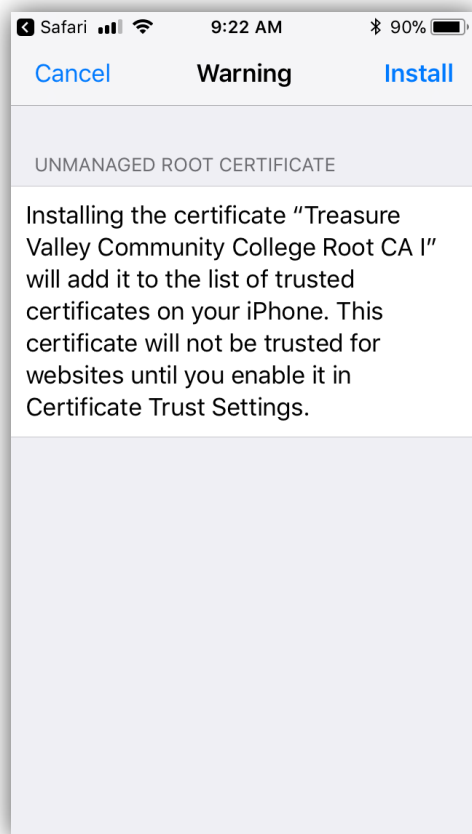

10. Touch Install to install the Profile

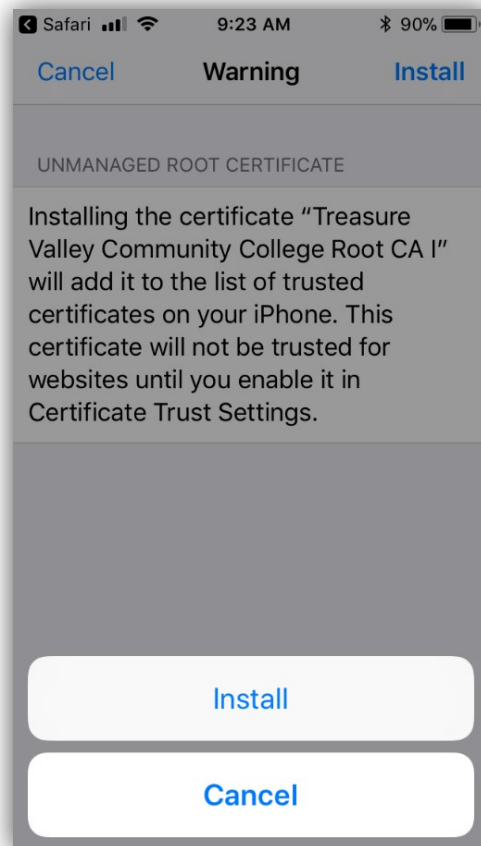

11. Enter your device passcode

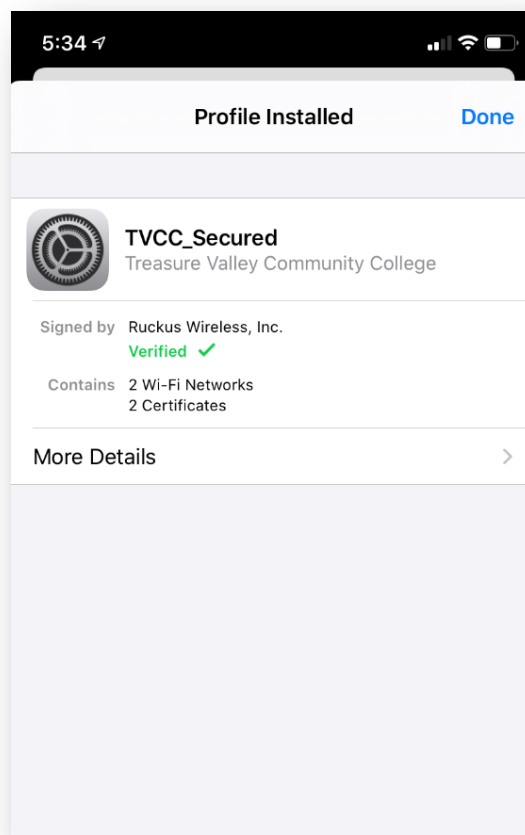

12. Choose 'Install' to install the certificate

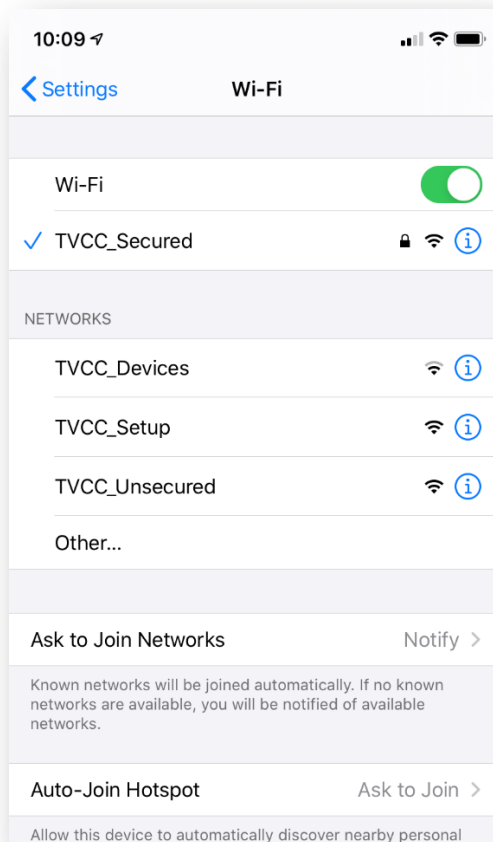

13. Choose 'Install'

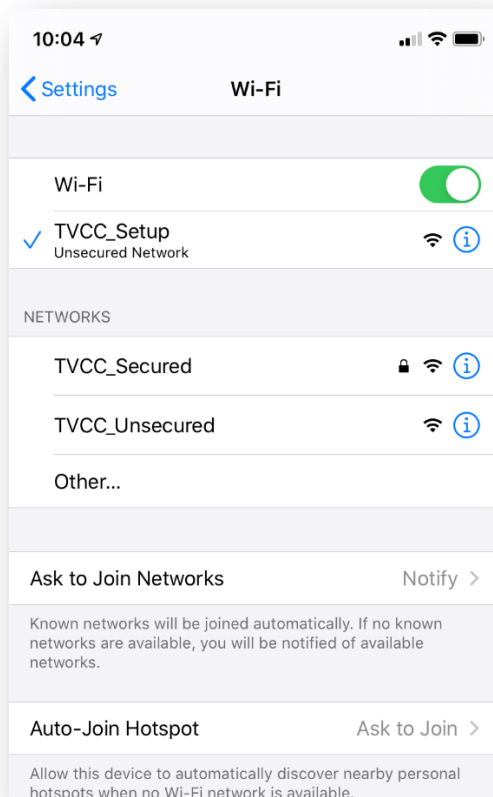

14. After the profile is installed, choose 'Done'

15. Open your Wi-Fi settings, and join the TVCC\_Secured network

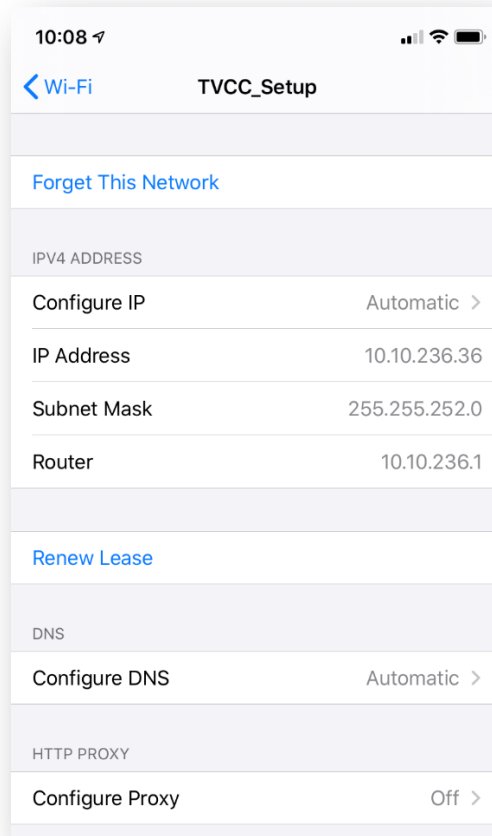

16. Go back to your Wi-Fi settings and touch the blue 'i' next to the TVCC\_Setup network

17. Choose 'Forget This Network'

18. Choose 'Forget' to confirm

19. Now choose TVCC\_Secured to join the TVCC network
