11. What aspects of your education in your degree or certificate program helped you with your learning, and why were they helpful?

ResponseID Response

ResponseID	Response
7	Definitely the skills that take place in the field.
10	For natural resources it would definitely be the field work when you actually go out to places and do things in person!
12	Bri Paddon becoming the lead flight instructor really turned the fixed wing program around.
13	Small classrooms allowed for more one-on-one time with teachers and advisors.
16	Hands on learning in the labs
20	The practice that we received in classroom settings.
22	Hands on leaning, but with covid going on that was not only difficult but frustrating as well.
23	Practical experience
27	Great CFI's
29	Online that way I could work as well as go to school
31	The Natural Resource Program at TVCC is very hands-on and helped me grasp the information being taught. I can apply these skills to my current job at the BLM.

ResponseID Response

35	Learning and adding to my knowledge of the office programs assisted greatly in learning the EHR software. having a grasp of medical terminology thanks to the courses I took greatly helped in clinicals
37	The availability of online classes helped me profusely in achieving my goal of attaining a degree. I am a non-traditional student who is a wife of a man struggling with a TBI, a mother of 6, with a full-time job outside the home. If it weren't for the online availability so that I could do my studies when they fit in my schedule, I never would have achieved what I have.
41	All classes helped me to get information and improve my language.
43	All are helpful
44	One on one help
45	The advisors always helped whenever needed. They were all great.
47	The hands on training
48	Professors that actually taught and not having teacher assistances teaching really helped.
55	Electrical classes helped me learn the fundamentals and a good foundation for work.
57	Many of my classes were in person and hands-on classes.
59	It helped me learn more and apply what I have learned to my work.
60	Na
62	They gave me a broader knowledge that sharpens my communication skills in advocacy
63	The way the AAS in Addiction Studies is laid out helped me tremendously by the time I entered my work experience with Adapt Oregon. Not only did all of the courses help in their individual way in preparing me for the work force, some were carefully selected as courses required for state certification. I appreciate every aspect of my experience with TVCC.
66	The writing lab, and math lab
72	TVCC provide instruction assistant helped me with my homework. Charla was very helpful because English is second language for me and it was very hard to me understand most of my homework and she always explain every email for me.
74	A lot of the on hand field days.
75	Learning to research and learning to write helped me with my learning. Those aspects of my education were necessary in many of my classes.

ResponseID Response

76

The step program was very helpful and also Charla Wheeler.

12. What might your degree or certificate program do differently that would help you learn more effectively and why would these actions help?

ResponseID Response

7	Well we did some field work but more field work would help
8	The availability of the complex and multi engine aircraft. I had to pause my flight training for 1.5 months waiting for a complex aircraft to complete my commercial pilot certificate, which is a requirement in my degree. I am still waiting for the multiengine aircraft to be available, therefore I have yet to complete my college degree.
10	I think at this point the degree is where it should be and is fine where it is and the way it is.
12	Availability of aircraft. I am still currently waiting for the multiengine aircraft to be available so I can complete my degree. My degree completion is on hold due to this.
13	I would not change anything because the program is set up for success. The professors really want their students to succeed.
16	I don't think anything needs to change
20	Connect with employers who can provide on the job training to put in practice skills learned in the classroom.
22	Much of covid was out of everyone's control.
23	More hands on experience

ResponseID Response

27 More class time

29 Videos

31 I love my degree and I believe that my professor, Marcus, does an amazing job teaching his students. We really enjoy what we are learning and hold on to information.

34 Make specific aircraft more available to complete degree. Waited 1.5 months for complex aircraft to be available and still waiting for multiengine aircraft to be available to complete that required flight lab for my degree.

35 I was satisfied with the course i was actually able to transition from a 1 year certificate for Medical Assistant to the AAS very easily

37 Allow all tests to be taken at home through Respondus Lock-Down Browser. It is difficult raising a family, tending to the time constraints of a full-time job, and fitting in the testing center hours. Either that or have the testing center hours later in the day for those of us who are non-traditional students who cannot fit their daytime hours into our schedules.

41 provide more practice.

43 Let people take the class they wanted to take and or give a good reason they should take a different class

44 Be clear on classes needed and help determine transferring credits after graduation. I graduated later because i didn't realize i was short credits.

45 Get a better financial aid office. Many tears and so much stress was caused by their head person Diahann

46 Provide in class sessions for some courses. I learn best in a classroom.

48 Can't think of anything

55 So far nothing comes to mind.

57 It was difficult in the beginning to navigate all the class requirements and resources.

60 Na

62 I think the programs are outlined well.

63 I can't think of any changes that need to be made.

66 Keep the building open 24/7 and give the students a access badge to the building so they can use the computer lab and any other rooms to study

72 Help students like my situation (refugee) to get more experience in their field.

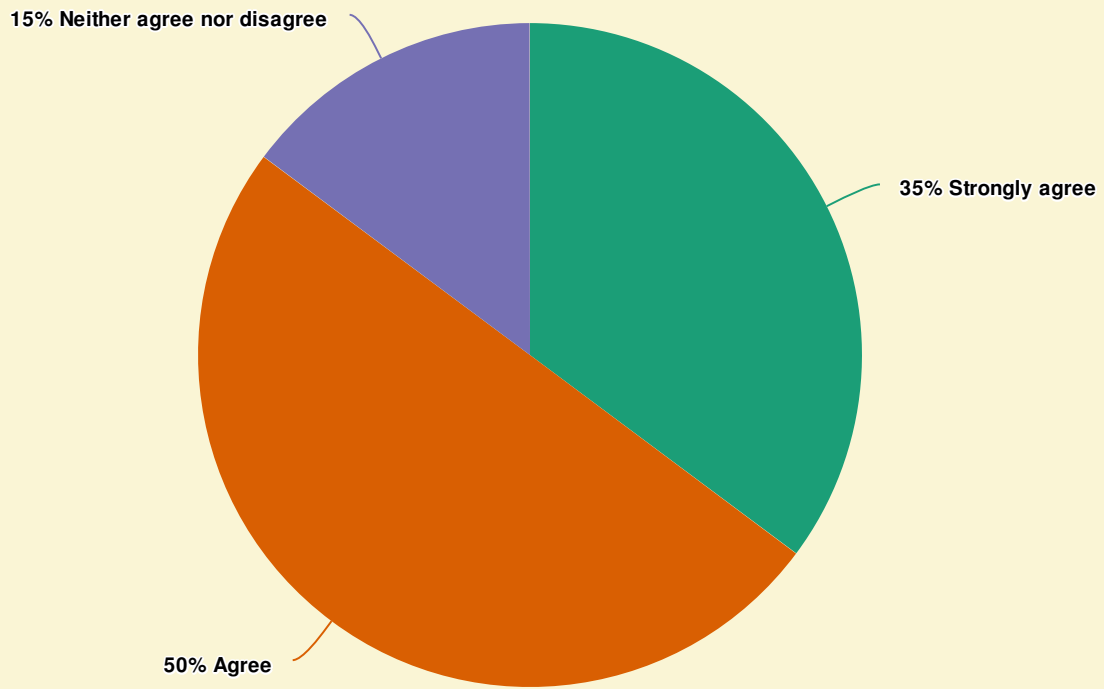

ResponseID Response

74 A little bit more field work.

75 I can't think of anything that would help improve my degree program.

76 We need night classes for those who have to work.

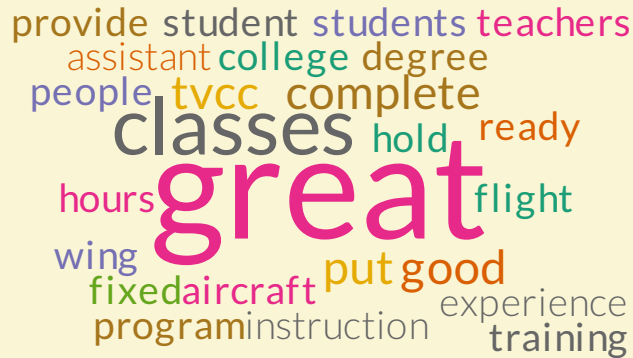

13. My overall experience at TVCC has contributed to my knowledge, skills, and abilities to gain employment.

14. Is there anything else you would like to share about your overall experience at TVCC?

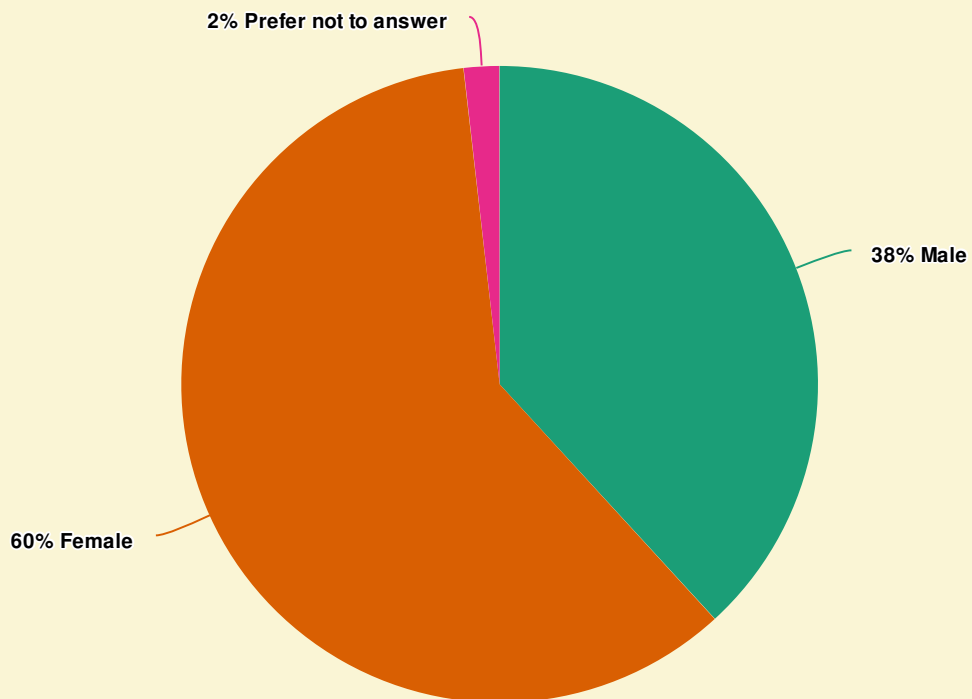

ResponseID Response

4	I loved every class that I took at TVCC. The teachers are amazing and I am so grateful for everything that I learned over there.
7	Nope it's been great!
8	Bri Paddon needs to be recognized for the work she has put in for the fixed wings program. I was the first to complete the fixed wing program solely out of Ontario, OR and she was a massive part in getting me to where I am today.
10	It's been great so far, meeting people and the classes have been great as well!
12	My flight training was put on hold for 1.5 months due to aircraft availability and not my degree is currently on hold because of the same issue. I believe if the college is requiring certain FAA certifications to complete the degree than the aircraft should be available when the student is ready. Advertising something and not making it available.
14	Justin is a great teacher
16	No
20	Flexible tutoring hours.
22	Kilee was great!
27	Nio
29	Not at this time

ResponseID Response

34	Brianna Lemmons has done an excellent job getting the fixed wing program in the direction it needs to head. Still disappointed the specific aircraft needed to complete my degree were not made available when I was ready for them. Put my flight training on hold. Not sure how a program can expect a student to complete a requirement when the required aircraft is unavailable to fly.
35	With the help of a great staff I was able to succeed in my goal so thank you TVCC staff
37	n/a
41	provide more people(instruction assistant) to help us in our homework
43	I like it but teachers pushing there view on you and make you uncomfortable with being there in the English department was my only bad experience I had
44	Good school. Good experience
45	It was great! Wish covid didnt delay things but so does everyone else lol
48	Good professors with lots of qualifications
55	Go Chuckars!
57	My advisor in Natural Resources has has provided valuable support in what classes to take and providing positive learning experiences in the classes.
60	Na
62	Love the classes and the instructors.
63	The faculty is exquisite- a special appreciation for Jessica Breidinger.
66	The professor are all very helpful and caring
72	Provide more hours as study work to help students pay their pills. Provide Another instruction assistant with Charla to help more students.
74	Nothing it's been good so far.
75	TVCC, prior to the pandemic, had too few students attending the Caldwell campus. Some classes were full, but those were few and far between. One my classes had only three students enrolled, myself included. It would be nice if the Caldwell campus pushed harder towards recruiting more students. The Caldwell campus sometimes didn't feel like a college campus.
